

How do we stop BBW?

1. Remove Sick Plants

BBW spreads from sick plants. Remove the source of disease.

- Cut and heap sick plants

2. Remove the Male Bud

BBW is spread by bees when they go to the male bud.

- Remove the male bud with a forked stick

3. Clean Tools

BBW is spread by tools like knives and hoes carrying the disease.

- Clean tools with fire or Jik
- Cut off only dry leaves

4. Don't Use Sick Suckers

BBW is spread by planting sick suckers.

- Don't move suckers from sick gardens
